B

Parliament New South Wales
Aug. 16. 1813.

Read at Com^{tee} May 9/14

Dear Sir

I am exceeding happy to inform you that I have received very late Accounts from Tuaterra and that he is going on well. All the vessels that have touched there since his Return have been safe, and were supplied with every thing the Country could afford. Two young men, sons of two Chiefs have arrived in the last vessel from New Zealand. I expect one of them in a few days to live with me for a time. The way seems gradually opening for a mission to New Zealand. The natives are getting on with their cultivation, and have now plenty of maize, pigs, Potatoes & other vegetables - and the wheat I sowed a few months since I am informed is growing very well - Tuaterra has a perfect knowledge of the cultivation of maize & wheat. Bread will be

Aug. 16/13

a wonderful advantage to these poor savages
and be a means of preventing their civil wars.
A young man, I have now at Parauadto (who
has lived in New Zealand for about a year) learning
to make bricks - As he wishes to return, and seems
a young man of good natural parts, and a very
kind disposition by nature, tho' not pious, I think
he will be very useful at some future period to
the mission, when it comes to be established.
I should have endeavoured to have begun the mission
before now, had not the unfortunate loss of
the Boyd happened. I was afraid if anything
serious should happen to the missionaries I might
have been blamed. I have no doubt but the way
will be made plain, and clear. And that we
shall have the most friendly intercourse with
the natives - Had there been a vessel that could
have been employed in the mission much
might have been done before now - I am

Aug. 16/13

in expectation of removing this difficulty in time.
either by purchasing a Part of a vessel myself,
or of being able to hire one. I had much conversation
with Mr. Hall to day on the subject of the mission
I wished him to devote his time to the instruction
of the two young men who have just arrived
but I cannot prevail upon him to do this without
incuring too heavy an expense to the Society.

He wants me to allow him \$15⁰ per annum
for his services - and Mr. Hall. I think this hem
entirely out of the question, but he will not
engage with me for a less sum. Mr. Hall is a
pious man, and a man of great knowledge as a
mechanic; but naturally has a stubborn disposition
nothing kind, and tender in his composition. In
this settlement he can earn much, with little
trouble, as the price of labor is so very high.
He seems to have forgot for what purpose
he was sent out. He says he has no objections

Aug. 16/13

now to go to New Zealand, but he does not seem to wish to go unless a number go with him. I informed him, that I expected the Society would call upon him to repay all the money that they had expended upon him when in England; and that he must prepare himself for such a just Demand, unless he fulfilled his agreement with the Society. This he did not seem to like. He will still be a very useful man to the mission as a mechanician in New Zealand, and there he would be little or no expense to the Society, if he was once settled there. for the Articles of Commerce such as Tinskin, &c. &c. sent to Port Jackson would pay all expenses. He is a most industrious man, but will go his own way. Mrs. Hall is an excellent woman. and will make a good missionary. I have an intention of beginning to instruct these two young Chiefs now in Agriculture, and to make an Axe or Hoe. Agriculture will make the way clear for the missionaries - it will find employment

Aug. 10/13

for the natives, and furnish them with the means of Support. If they are only instructed in this useful Knowledge, New Zealand will become a great Country. I wish the Society would send me out a few Axes. Hoes - Spades. Saw's common Pins. fish hooks, needles, and those useful Articles for them as soon as they can.

Axes Hoes &c, are very dear here. and at the same time a few Iron Pots - and Iron Pots. and a hand wheat mill for them to grain their wheat. These things will be of infinite value to them. and will have the best effect. They will now give a large Hoz for a small Axe and a Bag of Potatoes for a small bit of Iron Work. that they can fasten into the end of a Rod to work with. I think the natural Flax of New Zealand would be a valuable Article of Commerce. Any quantity may be got. Mr. John King is not very well - he

13 Aug. 1613

He has not been well for a long time back. I think he has some Family Insanity about him. He is poor, and goes on well when he is well, but his mind has been affected both before and since his marriage, and I am afraid of a return of his Complaint. I am looking out for the missionary you mentioned in your last. I wish he was here now - he should begin his work immediately with the two men that are here, till a further opening was made. All the masters of vessels I have seen and conversed with who have been at New Zealand are of opinion that the missionaries will be perfectly safe amongst the natives. I am anxious much has been done already towards the mission - by that friendly intercourse which is now opened and by Quaterra and

Aug. 15/13

one of the Priests living in my House.
They have acquired a certain degree of knowledge
by joining in Parochial worship, attending constantly
upon public worship, and by conversing with
them upon Divine subjects. Their minds are
prepared for further instruction - I have enclosed
a few Threads of the New Zealand Plan which
was sent me a few days ago. Slip Loads of
this Plan may be got at New Zealand. Shall
it be valuable - will you have the goodness
to request some Gentlemen of the Society to
ascertain its value. I have sent it, as I received
it. I think it would be turned to some good
Account - and might also find Employment
for the natives to collect it. Present my respectful
compliments to the Society - wishing that
all their labours may be blessed -

A. Rev. J. Pratt.

I am
Dr Sir your obedt humb. Serv
Samuel Mariner
