Dec. 16th 1814

My Dear Sir

We were very happy to receive yours to Mr Wood of Dec. 28/13 and March 11/14 with those to me of March 11th and June 15th.

None of March 18th last I hope you have received, and will shortly have another of Aug. 18.

It gave me much pleasure in having heard of Mr Hall's having taken up his work, and that you and he proceeded to New Zealand.

You will see by the Nuffry Register what notice we have taken of Mr Marsden's efforts to rescue the South Sea Islanders from oppression & cruelty.

I have accepted your draft for £120. for salaries up to Christmas. As we trust an auxiliary Society will be formed in N.S. Wales, all our concerns must henceforward be placed under its management, as it will be necessary in so distant a quarter often to take important steps before an opinion can be had from home. Also can we reasonably fear that we shall have cause to rescind the proceedings of men ^{animated} ~~entirely~~ by the same views as ourselves, and judging from the best local information.

With respect to yourselves and families give up all to the glory of God, and be assured of the kind care & protection of the Society. I have urged this on Mr Hall and John King. In proportion to your fidelity, activity, and devotedness in your great work, the Society will feel its obligation to be the protector of all whom you may leave
