

future with the Society that I shall put you
 to as little trouble as possible. You could send
 me out articles to the amount of one year's
 salary at once. After I received one allotment
 I could give you suitable directions how to
 select another. By this means much trouble
 would be avoided in collecting together
 detached accounts. I have drawn my salary
 of Mr Marsden up to Dec: 31st next, and my
 letters being sent unsealed to New South
 Wales for the inspection of Mr Marsden he will
 see and approve of what I am doing.

I shall want a portion of fish hooks, knives
 and little ornaments to distribute as rewards
 amongst the children. A gross of combs for the
 hair (the teeth large and small) a few pairs of
 large scissors, knitting needles, pins and
 needles for sewing will be useful. I believe
 we shall take a few girls as well as boys.
