

14. I told her to come & go with me I would give her some food, she came Das staying down with me, my wife gave her some meat and kept her till tea-time & gave her tea - when she went Mrs. King told her to come to morrow to work & she would give her food thinking this would keep her from attempting the same again, it appears to me to be the best time to show our good will towards them when in distress, when they ^{are} in health good words and works have but little weight with them,

18. At nine at night M. Kendall & I went off along with Shunghe & his friends to Kide Kide to sow wheat, I got into a canoe with a number of natives, they upset it before M. Kendall got into it, so I was very wet, had to change my clothing before I could proceed on my journey, we then got into our own Boat & set off by the light of the moon, when we was got half way we went a shore stay about two hours until the turn of the Tide, we arrived at Kide Kide about ~~four~~ ^{five} in the morning, we got a little refreshment, went to see the ground we was much pleased to see so much prepared for wheat M. Kendall sowed it we left at one in the afternoon got home at five in the evening on the 19,

21. M. Kendall & I went a short distance with some natives to sow wheat after we had sowed it and returning home the wind rose and it began to rain that we had hard work to wash home by night, the rain and wind had almost blown & washed the brush that down the water was ankle deep in our bed room, so my wife and two little children was almost as bad of as my self

30. Received the brief trial from the river Thames Captain Howell and another small vessel which sailed with him belonging to the same owner, Mr. Howell informs us that on the 20th inst, the natives not far from the Thames made an attempt to take the vessels war began five white men was killed it is supposed that fifty or sixty of the natives were killed, this news was alarming to us especially to the Semials,

Sept. 1. Tuma hearing this news would stay no longer with me he told me it was very good to kill & eat the white people, but no good to kill N. E. men, Cochoya our little girl tells us that beyond by all our children will be rosted and eat, she is ^{about} afraid to sleep in our house at these times, Tuma is a boy that would soon learn any thing was he so inclined, he likes to come and go as he please, after cutting his hair cleaning him from filth and lice, making him clothing, washing & mending keeping him clean feeding & learning him, for him to go back into filth and dirt with half a belly full is as surprising as it is distressing to me

5. Mr and Mrs. Hall moved over to ~~Washington~~

To the Red of Point.
